

**ADVENTURE
EQUIPMENT**

THE
ULTIMATE GYROSTABILIZED CAMERA EQUIPMENT

2006 ACADEMY AWARD - TECHNICAL ACHIEVEMENT AWARD

ABOUT THE COMPANY

Adventure Equipment is the only company providing the products and professional services filmmakers need to capture the most stable images in the industry.

ABOUT THE FOUNDERS

Lev Yevstratov is a Moscow State Technical University-trained engineer. After earning his PhD and building stabilization systems for military applications, Yevstratov came to the U.S. to apply his expertise in the film industry. He co-founded Adventure Equipment with George Peters in 1998

George Peters began working on movie sets as a teenager, and has since amassed extensive experience as a camera operator and director. As co-owner of Adventure Equipment, Peters often works on set managing the company's crews and operating its camera cranes and heads.

ABOUT OUR PRODUCTS

The Ultimate Arm: The only flexible camera crane on the market, The Ultimate Arm is a high-speed, high-torque, lightweight remote-controlled camera crane. It is designed and developed for extreme operating conditions and for high-image stability, as well as for low-speed "walk and talk" or extreme off-road conditions.
